Overview[\[edit\]](#)

This page contains guidelines on how to process payments in ZenCart/osCommerce-based store using [X-Payments](#).

ZenCart can be connected to X-Payments by using X-Payments Connector. This ensures correct implementation of the following tasks:

- Importing the data on active payment methods from X-Payments to ZenCart/osCommerce;
- Transferring cart and customer details from ZenCart/osCommerce into X-Payments;
- Redirecting the customer from ZenCart/osCommerce to X-Payments and back to ZenCart/osCommerce;
- Synchronizing transaction and order details between X-Payments and ZenCart/osCommerce.

System requirements[\[edit\]](#)

Zen Cart? Version: >= v1.3.8 osCommerce Version: >= v2.2

Video tutorial[\[edit\]](#)

Installation[\[edit\]](#)

Download the X-Payments connector:

- for ZenCart at https://drive.google.com/a/x-cart.com/file/d/0B6p7sehSZL8_aUhfOGhmZVRZUFk/view
- for osCommerce at <http://addons.oscommerce.com/info/9415>

Unzip the downloaded archive and follow the readme instructions.

Configuring the Connection to X-Payments[\[edit\]](#)

The following procedure assumes that:

- ◊ You have an X-Payments account created using <https://www.x-payments.com/trial-demo.html>
- ◊ You have completed configuring the connection to your ZenCart/osCommerce store on the X-Payments end.

After configuring the connection in X-Payments, log in to your ZenCart/osCommerce store Admin area and complete the connection.

Follow the steps below:

1. Log in to the ZenCart/osCommerce Admin area.
2. Go to the X-Payments connector settings page (Modules -> Payment -> X-Payments connector).

This will open the X-Payments Connector configuration page.

Secure Credit Card processing (X-Payments) (configured for SecurePay)

Enable X-Payments Module
Do you want to accept XPayments payments?

☒ True
☐ False

Payment Zone
If a zone is selected, only enable this payment method for that zone.

--none-- ▼

Set Order Status
Set the status of orders made with this payment module to this value

Pending ▼

Sort order of display.
Sort order of display. Lowest is displayed first.

3. Configure the connection details.

- ◇ **X-Payments configuration bundle:** A string, containing all the required settings details, which is generated in X-Payments back-office.
- ◇ **IP addresses for X-Payments callbacks:** enter IP address of the server where X-Payments is installed. "127.0.0.1" can not be used here. For better understanding what IP address to put here see [Callback from X-Payments to the store](#).

◇ **Payment currency:** Currency

Click the **Update** button.

4. Select an available payment method.

After all the settings have been configured, click the **Edit** button and select one of the available X-Payments methods.
